Our slow grown, free range Devon White birds are grown and processed by Chris and Hollie on their farm in the North Devon countryside.

Grown for twice the life of a standard chicken, with twice the flavour.

With the same genetics and consistency as the Cotswold White, bringing a great tasting, fuller flavour bird. Approved by the Better Chicken Commitment

Our other fantastic free range supplier is based in Janzé, Brittany in North Western France, where they are able to ethically rear much larger flocks of birds with the same high welfare standards.
